## Site Preparation

## Runner Spacing

Site Prep
Pressure Treated 4x6 Border is secured by 2' metal rods

Stones extend 1 foot beyond shed on all 4 sides.

## Site must be level!

4 " of stone under entire shed. Shed sits on the stone.
Stone should extend 1 foot beyond edge of shed on all sides.
This allows water to wick away from the shed and helps keep the shed dry.
$3 / 4$ " stone and/or \#57 mixed stone size stone is recommended .
